Measure in inches. For help refer to the example layouts on our website.

Area name	Width inches	x	Length inches	=	Total square inches	÷	by 144	=	Square feet
Area/room 1.		x		=		÷	144	=	+
Area/room 2.		x		=		÷	144	=	+
Area/room 3.		x		=		÷	144	=	+
Area/room 4.		x		=		÷	144	=	+
Area/room 5.		x		=		÷	144	=	+
Area/room 6.		x		=		÷	144	=	+
Area/room 7.		x		=		÷	144	=	+
Area/room 8.		x		=		÷	144	=	+
Area/room 9.		x		=		÷	144	=	+

Add the actual total square feet for each area/room and write it here →

Required percentage of additional flooring is ___ % . Example for 5% x .05, 10% x.10 +

Total square feet required= _____

**Tip: When purchasing your floor always round up to the next carton.*
